

The Concept:

The intent of the MegaTruck initiative is to reduce our customer's per ton freight costs therefore strengthening our business relationship.

Also, as a SmartWay Transportation Partner we endeavor to be environmentally sensitive and use creative methods by which we may haul more freight while reducing our carbon footprint.

The benefit for the driver of the MegaTruck is freight consistency and the flexibility to pull Mega loads or standard OTR freight.

Loading:

MegaTruck loads maximize the floor space of the trailer

Some Specifics:

Maximum tractor empty weight cannot exceed 16,000 pounds

Sleeper berth is limited to 70"

Driver and gear is limited to 500 pounds

Keep 5th wheel as close to cab as possible

Use "Super Single" tires on aluminum wheels

Limit fuel cap size and capacity to 100 gallons
